

GREESHMA R R

SENIOR SOFTWARE ENGINEER

greeshmarr23@gmail.com | 7892056793 | Bangalore

PROFESSIONAL EXPERIENCE

Synamedia

June 2022 - Present

Senior Software Engineer - Frontend Developer

- Built production-ready OTT applications for Samsung & LG Smart TVs using ReactJS, JavaScript, and spatial navigation, improving content engagement.
- Developed and maintained core UI modules including content carousels, search interfaces, settings screens, and video player overlays, tailored for large-screen, remote-based interactions.
- Implemented centralized state management using Redux, including actions, reducers, and middleware for robust UI workflows.
- Collaborated with UX and design teams to deliver high-performance, intuitive, and accessible UIs across multiple screen resolutions and TV models.
- Integrated key-based navigation logic using @noriginmedia/norigin-spatial-navigation, enhancing focus flow and user experience on Smart TVs.
- Focused on frontend performance tuning – optimized rendering, lazy-loaded routes/assets, and reduced initial load time by 25%.
- Worked on multiple POCs to run web apps on Senza platform (Synamedia Senza is a cloud-powered video streaming platform designed to deliver web apps and video content seamlessly to any TV screen.), which were successfully demoed to customers as part of sales and client onboarding initiatives.
- Explored and leveraged Generative AI tools (GitHub Copilot, Anima, etc.) to automate code generation workflows, including Figma-to-React conversions, thereby reducing manual development effort and improving delivery speed.

Software Engineer - Full Stack developer

- Developed an internal web application (Admin Console) used by operations and admin teams for managing product configurations and analytics. Built full-stack features using ReactJS, Node.js, and MongoDB. Implemented unit and integration tests with jest and pytest
- Integrated OAuth 2.0 authentication for Admin Console, ensuring secure and role-based access control using Auth0. Enhanced login flow with refresh token support and session management.
- Worked on migration of server architecture to a serverless model using AWS Lambda, API Gateway, and DynamoDB, reducing infrastructure costs and improving scalability and deployment efficiency.

Tata Consultancy Services - Software Developer

Aug 2020 - May 2022

- Worked on an IAM-based credential management tool, focusing on server-side development using Python. Developed and maintained RESTful APIs to support secure credential operations and user access workflows.
- Built an independent agent module to track user activities for auditing and monitoring purposes.
- Contributed to product enhancements and automation based on evolving client requirements, improving operational efficiency and reducing manual intervention.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, TailwindCSS
- **Frameworks/Libraries:** ReactJS, Redux, React Router, Jest
- **Smart TV:** Spatial Navigation, Remote UI Patterns (Samsung/LG)
- **Backend Exposure:** Node.js, Python, REST APIs
- **Cloud & DevOps:** AWS Lambda, API Gateway, DynamoDB, Auth0
- **Database:** MongoDB, SQL
- **Testing:** Jest, React Testing Library, PyTest
- **Tools:** Git, Webpack, Figma, Postman

INTERNSHIPS

Winter Intern at Indian Institute of Technology, Patna (2 months)

- Domain: Machine Learning
- Worked on ML-based Network Slicing for 5G and Resource Allocation for Electric Vehicles (EVs).
- Co-authored a research paper based on this work, published in Springer and indexed on Google Scholar.

Intern at Grid R&D (2 months)

- Domain: Data Science
- Worked on developing an Automated Stock Market Trading System.

EDUCATION

May 2016 - May 2020

B.E in Computer Science and Engineering

Global Academy of Technology

8.3 CGPA
